Meeting Announcement: Tuesday, March 20, 2018

Lighting for Elders and Assisted Living

About the Presentation

Lighting for Elders and Assisted Living explores how health and safety can be improved for the elderly population through careful selection and placement of light fixtures and finishes. As our population continues to age so do our eyes. The visual requirements of older persons are much different than the younger population. Increased light levels, attention to contrast, detail and the healing attributes of lighting are all important factors in designing lighting for the elderly. This presentation will identify ways in which the eye ages and what we can do with lighting as a tool in designing for the aging eye.

This presentation will provide 1 CEU.

About Our Speaker

Phil Acone, LC, Sales Manager, Eaton Lighting Solutions

Phil Acone, LC is a Specification Sales Manager for Eaton Lighting Solutions. He is a member of the Illuminating Engineering Society of North America, and holds the LC credential from NCQLP.

Phil has presented seminars on lighting for educational facilities, healthcare facilities, office lighting, retail lighting and lighting for exteriors. He has spoken to audiences at Lightfair International, various IES chapters, the Retail Design Institute, and numerous architectural and design firms.
Please forward this meeting notice to your friends and colleagues in the lighting industry.
